

Walkthrough - Area of Interest

In order to select an area to analyze, the area of interest must be identified in the Asphalt Intelligence viewer.

1. With the InSight viewer open, click **Zoom to Draw Polygon**

2. The viewer will automatically zoom to the resolution required for processing. There will be two messages that pop up at the bottom of the screen:

Remember: the following actions are locked while the polygon tool is active, until the polygon is completed & processed, or click **Start Over**

Zoom: **LOCKED**

Pan/Move: **LOCKED**

Walkthrough - Area of Interest

3. Click to place points (corners) of the polygon to be processed

4. Once the polygon is closed (click the first point again to close it), a message will pop up at the bottom of the screen

5. At the top of the screen, enter a job name. Click **OK**

6. Once processing is complete, a message will pop up to either review the results or continue and process another polygon

Walkthrough - Area of Interest

7. If processing another polygon, click on Process Another. The view and zoom lock is released, and the previous polygon is shown in a green outline to allow easier drawing of the next polygon

Walkthrough - Area of Interest

8. The five most recent previous Area of Interest polygons are shown in green, and summarized in the upper right, for reference. These can be turned off by unchecking the box next to them (1), or they can be zoomed into by clicking the magnifying glass (2)
